

Maths Resources

Teaching is underpinned by methodological curriculum design, with units of work that focus in depth on topics. Lessons and resources are crafted carefully to foster deep conceptual and procedural knowledge. Teachers draw from a range of high-quality resources such as White Rose Maths schemes, Maths No Problem, Gareth Metcalf and NCETM to expose children to a variety of fluency, reasoning, and problem-solving opportunities.

Concrete, pictorial and abstract approaches are used to develop conceptual understanding. Teachers make clear links to real-life contexts to further broaden children's ability to apply their mathematical knowledge. The EYFS early learning goals also include problem solving. Providing a range of puzzles and other problems helps pupils to reason strategically to:

- find possible ways into solving a problem
- sequence an unfolding solution to a problem
- use recording to help their thinking about the next step.
